

Royal College of Physicians, London

CASE STUDY

Project

Royal College of Physicians, Regents Park

Structure

A modern mosaic clad design completed in 1964

Client

The Royal College of Physicians, London

Contract Value

Various - £25k each

Contract Details

Martech have carried out a number of contracts over the last few years at the RCP.

An initial contract dealt with an indicative survey of the external mosaic clad elevations acting in conjunction with the RCPs retained surveyors. This identified limited areas of mosaic deterioration and minor concrete deterioration.

A more detailed survey of all mosaic clad surfaces was undertaken the following year, with a view to fixed cost repairs.

Mosaic and concrete repairs were undertaken in 2005 with all works carried out from roped access by our in house engineers. Some roof repairs were added to this contract, as were some minor internal mosaic repairs.
